## Your Water Quality Report is Now Available Online!

Each year, Lehigh County Authority provides its customers with an annual Water Quality Report to let them know how our water quality stacks up against established federal and state drinking water standards. We encourage you to review this report as it provides details about the source and quality of the drinking water delivered to your community in 2014. In an effort to be more environmentally responsible, we are

making the reports available online. Please use the guide on page 2 (back) to find the report for your area on our website.

If you wish to have a paper copy, you can print one directly from our website. You can also receive a printed version by contacting us at 610-398-1444.

### **Attention landlords, businesses, schools and other groups!**

Please share this information with tenants, students and other water users at your location who are not billed customers of Lehigh County Authority.

## NATIVE PLANTS ARE BEAUTIFUL & WATER FRIENDLY

In Pennsylvania, our climate and normal rainfall amounts are advantageous for a wide variety of native plant species that are both beautiful and hardy. Using plants that are native to our region in your landscaping can help you to conserve water, as they will thrive under normal weather conditions without supplemental watering. And because they are native to Pennsylvania, you can expect beautiful results for less money and effort than you would expend on more exotic, non-native species.
