

LCA Currents

Water news straight from the source.

Every drop matters.
Every customer counts.

Your Water Quality Report is Now Available Online!

Each year, Lehigh County Authority provides its customers with an annual Water Quality Report to let them know how our water quality stacks up against established federal and state drinking water standards. We encourage you to review this report as it provides details about the source and quality of the drinking water delivered to your community in 2013.

In an effort to be more environmentally responsible, we are making the reports available online. Please use the guide on page 2 (back) to find the report for your area on our website.

If you wish to have a paper copy, you can print one directly from our website. You can also receive a printed version by contacting us at 610-398-1444.

LEHIGH COUNTY AUTHORITY

1053 Spruce Street
P.O. Box 3210

Allentown, PA 18106-0348

(this includes portions of Upper and Lower Macungie, Salisbury, South Whitehall, Upper Milford and Lowhill townships, called our "Central Lehigh Division.")

You can help keep our water clean!

When you think of "water pollution," what do you think of? Maybe you envision a factory discharging some sort of chemical into the environment, or an oil spill from a tanker accident. Perhaps you are thinking of an old landfill or the mishandling of fuel at a gas station.

These sources of pollution are definitely scary to think about and difficult for an individual resident to control. But did you know that the Number 1 source of water pollution today is something as commonplace as rain-water runoff?

When it rains, water has just few options regarding where it will go. It can soak into the ground and be absorbed by vegetation in the area. It can soak deeper into the ground to replenish our sources of groundwater. Or it can run off the slopes, into the streets and into a nearby storm drain, where it will eventually end up in a local stream.

No matter where the rainwater goes, it has the ability to pick up pollution along the way, even from your back yard or driveway! This pollution can end up in our precious water resources by flowing into streams and rivers, or soaking into the soil to reach our groundwater supplies.

How you can help:

Don't Dump: Anything you put on the ground or down a storm drain can make its way into our groundwater or other water sources. Contact the Lehigh County Office of Solid Waste at 610-799-4177 to find out how to dispose of household hazardous wastes.

Lawn Care: Use only as much fertilizer as your lawn or garden really needs, and be sure to pick up after your pets!

Care for Your Car: Oil spots left on driveways and parking lots can wash away with the rain and will end up back in the environment.

Report Spills: Call 9-1-1 if you witness accidental or intentional dumping of unknown substances into our environment!

All of us at LCA thank you for your efforts to keep our water clean and flowing!

Every drop matters. Every customer counts.
